

High Definition™

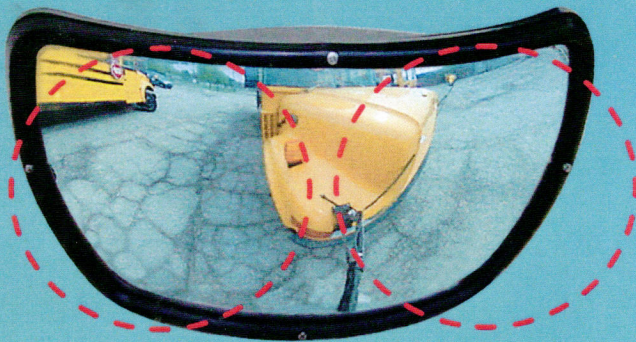

The Industry's Only Bi-optic Cross View Mirror

- Enhanced Danger Zone Imaging
- Attractive New Styling
- Rugged New Construction
- Fast and Easy Servicing

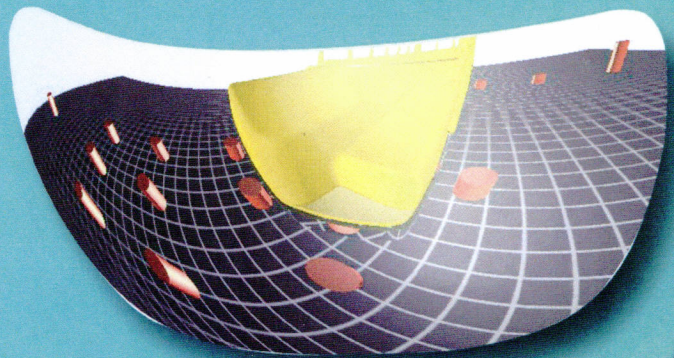

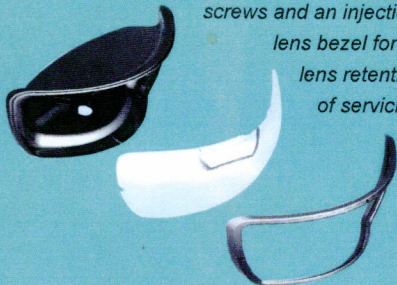

The High Definition™ features the industry's first "bi-optic" mirror lens. Unlike most convex lenses, it combines a pair of focal points to seamlessly concentrate focal power where you need it most.

Dual Convex Focal Points

As a result, the reflected images of objects around the bus are larger while the image of the bus itself is smaller. This improves driver comprehension by enhancing danger zone imaging.

The High Definition lens is secured with 4 stainless steel screws and an injection-molded lens bezel for dependable lens retention and ease of servicing.
